

## Development department of software system

### Consulting stage (without charge)

#### Requirement arrangement

Discuss with customers and determine the requirement

#### Feasibility evaluation

Technology evaluation  
Technology investigation  
Development time estimation  
Risk evaluation  
Development risk  
Manufacturing risk  
Economic evaluation  
Development expense estimation  
Manufacturing time estimation  
Manufacturing cost estimation

Abandon the development

Feasible?

Determine to develop

### Development stage (development contract)

Development contract signing

Customer pays for the development of deposit  
(first payment)

**Demand analysis**  
Further confirm the requirement, then form a written document and get customers' confirmation

**Software design**  
Functional design, data design, modular design, interface design and process design

Software UI design

Completion of UI prototype

Customer confirmation

Software Coding

**Integrated test**  
Test, adjustment and modification

Customer acceptance

Customer pays the development cost

One year warranty

Customer pays the warranty cost
